MILCOR STEEL COMPANY

Subsidiary of Inland Steel Company

4101 W. Burnham St.

Milwaukee 1 Wis.

Telephone: Mitchell 2350

NORTHWESTERN TERRITORY

Consists of the Cities of Sioux Falls, South Dakota; Omaha, Nebraska. Grand Forks and Fargo, North Dakota; State of Iowa (except Keokuk, Davenport, Burlington, Dubuque, Fort Madison, Clinton and other Mississippi River points); State of Minnesota (except Minneapolis, St. Paul and Duluth); State of Missouri (except St. Louis and other Mississippi River points). The exceptions are in Central Territory.

FREIGHT ALLOWANCE

Per Above Territory

Gutter, Eaves Trough, Conductor Pipe, Ridge Roll, Ridging, Continuous Hip Shingles, Ornamental Ridging, Galvanized and Tin Roll Valley, Formed Valley—Rail rate of freight only allowed on lots of 500 ft. or more.

Roof Edging and Barn Battens—Rail rate of freight allowed only on lots of 1000 ft. or more.

Accessory Trim as for above items—Rail rate of freight allowed when shipped with footage taking freight allowance.

Conductor Pipe Elbows and Shoes—Rail rate of freight allowed on lots of 15 dozen or more or when shipped with footage taking freight allowance.

Furnace Pipe and Fittings—Full rail rate of freight is allowed only on orders amounting to \$50.00 net or more for shipment at one time to points in the United States east of the Missouri River (excepting North and South Dakota and Minnesota points north of the 45th degree of latitude) and on the north of the southern boundary line of Tennessee and North Carolina and west of Bangor, Me.

Registers and Faces—Freight allowance as shown on pages Nos. 68 through 71.

Metal Lath, Cornerbead, Etc.—Freight allowance shown on pages No. 41 through 50.

It Takes Many Things to Make Milcor Products the Very Finest of Their Kind

4101 W

Consist
braska
cept
Clinton
(except
(except
tions a

Husky machines operating with watch-like precision, top grade materials to feed into them, and skilled workers to operate them are indispensable factors in turning out a quality steel product. But to make that product the very finest of its kind takes something more . . . something that makes the work of men and machines effective and meaningful.

That something is the *will* to produce the very finest, which means keeping in mind always the customer who is going to sell the product and the man who is going to use it.

The Milcor dealer is therefore of prime importance in the complete picture of Milcor production and distribution. Milcor has always realized that no merchandise, however good in itself, can actually be considered first in its class unless that tribute comes from a large public majority who are acquainted with the merchandise through using it. That calls for adequate and reliable distribution facilities.

Keeping dealer faith is Rule No. 1 with Milcor, for a man who believes in what he is selling is an asset to the manufacturer. Milcor's manufacturing skills, plus the service afforded by its nationwide network of plants and warehouses supplying its vast dealership, give full meaning to the assurance, *You buy the best when you buy Milcor products.*

MILCOR CONDUCTOR PIPE

CORRUGATED ROUND

PLAIN ROUND

Full 10-Foot Lengths — Packed 25 Lengths Per Crate
Conductor Pipe, made in three styles, is precisely straight. Milcor's intricate machines shape the pipe and seam it under pressure in one operation. The seam forms a strong, watertight joint.

Milcor Conductor Pipe is now made with an improved Crimp-end which facilitates the application of elbows and fittings.

MILCOR STEEL COMPANY

TWO-DRAIN CHANNEL ROOFING

with
PERFECT LAP

The design of Two-Drain Channel Roofing is such that the lap is actually tightened as the roof expands and contracts due to temperature changes.

The "PERFECT LAP" makes a tight lap at the end of the sheets as soon as it is applied to the roof.

PRICES PER SQUARE

MILCOR STEEL COMPANY

MILCOR NON-SYPHONING 1 1/4-INCH CORRUGATED ROOFING

The Non-Syphoning
Features Prevent
Leakage at
Side Laps

The Non-Syphoning feature is built into this roofing by the sharp break made in one of the lower corrugations of the side lap. This break produces an air space which offsets syphoning.

Any seepage that may occur from a driving rain, or from the corrugations being banked with snow, is carried away by the small gutter formed by the break. The capacity of the gutter is much greater than is necessary to carry all the water that may be driven over or through the corrugation.

MILCOR STEEL COMPANY

CORRUGATED ELEVATOR SIDING

1 1/4" — 2 1/2" Corrugated

Sheets are laid in such a manner that the elevator sides have a chance to settle without disturbing the fastenings of sheets. Our 2 1/2 inch Corrugated Sheets are 26 inches wide by 32 inches long, and cover 24 inches. 1 1/4 inch Corrugated Sheets are 26 inches wide by 32 inches long and cover 24 inches. The sheets are laid with a 2 inch end lap and the nails are two inches above the upper edge of the lower sheets, thus allowing the sheets to slip 2 inches in every 32 inches as the sides of the elevator settle and will not buckle or draw the nails.

MILCOR METAL BARN BATTENS

The use of these metal batten strips is an economical and practical method of weatherproofing barns, sheds and other buildings on which the outside boarding is applied vertically. Outer edges turn down and when nailed are held tightly against the boards. Center bead fits into the crack forming an impenetrable bond with the siding. Made of galvanized steel in 8 and 10 ft. lengths. Crated 1,000 ft. to crate. Rail rate of freight allowed on quantities of 1,000 ft. or more.

Price per 1,000 Ft. -----\$28.00

MILCOR STEEL COMPANY

(Continued from preceding page)

V-CRIMP ROOFING

For first course, mallet down side V-Crimp about $1\frac{1}{4}$ inches. Turn edge over sheathing at gable end and nail with $\frac{3}{4}$ inch roofing nails every 2 to 3 inches. Let lower end of sheet project $1\frac{1}{2}$ inches at eaves and slip wood strip under V-Crimp until lower end is flush with eaves. Snip sheets, turn down over edge, and nail.

When first sheet is in place, nail under end lock flange to sheathing. Hook end lock flange to sheathing. Hook end lock flanges together, mallet down and follow up roof to ridge.

In laying next course, overlap V-Crimp of sheets, nail through V-Crimp and wood stick with $1\frac{1}{4}$ inch roofing nails every 8 to 12 inches.

Drive nails on slant through side of V-Crimp, not through crown.

RIDGE ROLL FOR 5-V ROOFING

Note apron is embossed with 5-V design. Made in two pieces—adjustable to roof pitch.

Made in 26 inch lengths of Milcor Galvanized Steel.

PRICES PER 100 FEET

MILCOR STEEL COMPANY

ROOFING NAILS

IDEAL FOR CORRUGATED ROOFING

① ZINCLAD CALK SCREW NAILS

1. A Spiral Shank which provides better holding power and will not pull out. One-piece design.
2. A Leakproof Head which plugs the hole and cannot loosen or come off.
3. A Heavy Zinc Coating which protects the nail itself and also assists in preventing rust on the roofing around the nail holes.

ORDER WITH YOUR ROOFING.

½-INCH HEADS

Packed 100 lbs. to a Keg or twenty 5-lb. cartons to a case.
Requires approximately 1 lb. to square of Roofing.

Size	Nails Per Lb.	100 Lbs. or More	Less Than 100 Lbs.
1½" -----	120	\$0.317 lb.	\$0.337 lb.
1¾" -----	105	.317 lb.	.337 lb.
2" -----	90	.317 lb.	.337 lb.
2½" -----	74	.317 lb.	.337 lb.

② ANCHOR SHANK LEAD-HEAD NAILS

"Anchor" nails not only keep the roofing tight, but also, because of their soft lead heads, permanently seal and plug the nail-hole against moisture and leaks. The body of this nail carries a series of raised, anchor-like rings which imbed themselves in the wood. These anchors prevent any pull or twist after the nail has been driven. Tests prove that "Anchor" nails hold FOUR times better than ordinary nails.

Packed in 50 lb. cartons.

Requires approximately 1 lb. to square of Roofing.

Size	Nails Per Lb.	100 Lbs. or More	Less Than 100 Lbs.
1½" -----	108	\$0.37 lb.	\$0.39 lb.
1¾" -----	100	.37 lb.	.39 lb.
2" -----	94	.37 lb.	.39 lb.
2½" -----	70	.37 lb.	.39 lb.

For Galvanized Nails add \$0.03 lb.

③ LEAD-HEADED ROOFING NAILS

Requires approximately 1½ lbs. per square of Roofing.

Size	Nails Per Lb.	100 Lbs. or More	Less Than 100 Lbs.
1½" -----	97	\$0.35 lb.	\$0.37 lb.
1¾" -----	90	.35 lb.	.37 lb.
2" -----	83	.35 lb.	.37 lb.
2½" -----	70	.35 lb.	.37 lb.

④ LEAD-HEADED FASTENERS

Size	6"	7"	8"	9"	10"	11"	12"	13"	14"
No. Per Lb.	25	23	21	20	18	16	15	14	12
Less than 100 lbs.									\$0.47 lb.
More than 100 lbs.45 lb.

⑤ PATTERSON ROOFING CLIPS

Packed 250-500-1,000 Per Box\$52.00 Per M

Saves labor costs in fastening roofing or siding to steel structures.

Can be fastened to practically any size of structural steel shape.

CASINGS AND ACCESSORIES

These casings are designed for application before plastering. When the plastering is completed, the casings are integral with the wall and provide an air-tight junction between themselves and the jamb. The expanded metal wing feature of Nos. 4, 6, 60 and 66 provides a secure bond and key for the plaster around doors, windows and other wall openings and prevents cleavage cracks and pulling away from the wall.

All styles of casings are straight and uniform, affording perfect miters at corners and a neat, invisible union with the plaster surfaces. Furnished in 7, 8 and 10 ft. lengths. Packed approximately 500 ft. to the crate.

H & C BASEBOARD REGISTERS

NO. 130 SERIES
With Removable Face

No. 130 Series Registers, with removable face, are outstanding because of their distinctive appearance combined with large free area and low resistance. Flexible horizontal fins provide exceptional concealment of duct. Finest workmanship is reflected in every detail.

PRICES EACH — NO. 130

Stackhead Opening	10 x 8	12 x 8	12 x 9	13 x 11
Proj. from Wall at Base...	2 1/4"	2 1/4"	3 1/4"	5 7/8"
Free Area, Sq. In.	63	78	88	118
Metalustre Finish	\$3.00	\$3.60	\$4.50	\$7.88

H & C FLOOR REGISTERS

NO. 210 "NO-FLEX"

No. 210, with mesh openings $\frac{7}{16} \times 1\frac{1}{16}$ ". Free area averages 70%. Construction exceptionally rigid. Face removable from body. Screws are recessed below level of face. Very popular in Medium Dark Oak Finish. Class number of face only to fit body is No. 218.

PRICES EACH — NO. 210

One Piece
Heavy Steel

MILCOR STEEL COMPANY

MILCOR TWO BURNER BAKE OVEN

A large spacious oven, the No. 22 will accommodate six loaves of bread or a large roast. Sides and top are one-piece for strength and rigidity. The steel liner is firmly secured — cannot come loose. Large horizontal glass windows afford an excellent view of oven interior. New type grills can't fall out, but may be quickly removed for cleaning and easily replaced. Cross ribs run from back to front, making it easy to slide pans and dishes in and out of the oven.

Outside dimensions: 16" high; $9\frac{5}{16}$ " wide; $12\frac{3}{4}$ " deep.
Inside dimensions: $15\frac{5}{16}$ " high; $17\frac{7}{8}$ " wide; $12\frac{3}{16}$ " deep.
Grills are 9" deep. No. 22 — PRICE EACH \$7.10.

F. O. B. Milwaukee, Wis., and Chicago, Ill.

MILCOR SINGLE BURNER BAKE OVEN

Every quality feature of the larger Milcor oven is duplicated in the No. 111. Sides, top and back are lined with asbestos. The door casing is recessed, and an air space provided between the inner and outer panels of the door to keep in the heat. A built-in thermostat shows oven temperature. The flame spreader runs from side to side for more even heat distribution.

Roomy enough for four loaves of bread or a small roast. Made of Milcor Blue Finish Steel for durability and lasting satisfaction.

Outside dimensions: $11\frac{9}{16}$ " high; 12" wide; $11\frac{1}{2}$ " deep.
Inside dimensions: $10\frac{13}{16}$ " high; $10\frac{3}{16}$ " wide; $11\frac{5}{16}$ " deep.
Grills are 8" deep. No. 111 — PRICE EACH \$3.70.

F. O. B. Milwaukee, Wis., and Chicago, Ill.

MILCOR STOVE PIPE DRUM OVEN

The drum oven utilizes heat which would otherwise go up the chimney. It will be found very practical in the kitchen for heating water, baking, or warming food. In other rooms, with the oven door left open, it acts as a radiator and throws off a surprising amount of heat. A thermometer is set in the hinged door.

Length, 18"; diameter, $14\frac{1}{2}$ "; weight, 9 lbs. Made for 6" pipe only.

Packed one to a carton.

NOT AVAILABLE IN 1947

Prices and conditions subject to change without notice.

MILCOR VENTILATORS

HAZEL REVOLVING VENTILATOR

One-piece body construction provides a double thickness of metal at vane or top wing. Central balance of ventilator reduces rotating resistance to a minimum. Offset holes in bracket keep pivot pin clean automatically, preventing hood from sticking.

MILCOR SPINNER VENTILATOR

The slightest breeze keeps this ventilator operating efficiently. Construction makes down draft an impossibility. The shaft holding the revolving blades turns on ball bearings which run in a bath of oil.

NU-ALPINA VENTILATOR

Utilizes wind currents to draw foul air from buildings. The slightest movement of air striking the vane at the top of the ventilator swings the opening away from the wind. The vacuum thus created forcibly draws out the foul air.

PRICES EACH

HAZEL		SPINNER		NU-ALPINA	
Size		Size		Size

MILCOR STEEL COMPANY

MILCOR RURAL MAIL BOXES

Milcor mail boxes have been approved by the Postmaster General. Made of galvanized steel and coated with aluminum paint they are neat and finished in appearance and thoroughly weather-proof. Smooth, rounded corners and edges facilitate use by the carrier and owner, protect the mail. A corrugated drain in the bottom carries away moisture which would otherwise accumulate in the box.

NO. 2 MAIL BOX

Note heavy strap hinges on door. Strong snap bars hold door securely in place. The signal device works easily and the flag is coated on both sides with weather-proof red enamel.

Inside measurements: $23\frac{3}{16}$ " long, 11" wide and $13\frac{3}{8}$ " high. Shipping weight, 29 lbs. each, packed one to a carton.

NOT AVAILABLE IN 1947

NO. 1 MAIL BOX

Made of 22 gauge galvanized steel, coated with aluminum paint. Snap bars are punched so that box may be locked.

Inside measurements: $18\frac{3}{4}$ " long, $6\frac{3}{8}$ " wide and $8\frac{3}{4}$ " high. Shipping weight 8 lbs. each, packed one to a carton. 50 lbs., packed six to a carton.

PRICE EACH.....\$2.70
